# FOCUS

THE NEWSLETTER OF THE MATHEMATICAL ASSOCIATION OF AMERICA

## Mathfest Goes International!

*Contributed Papers*

*Special Sessions*

*Invited Addresses*

*Investing for Retirement*

*Student Activities*

The Mathematical Association of America  
1529 Eighteenth St., NW  
Washington, DC 20036

Postage paid at  
Washington, DC and  
additional mailing offices

**Mathfest98**  
Toronto | July 15-18

# FOCUS

FOCUS is published by the Mathematical Association of America in January, February, March, April, May/June, August/September, October, November, and December.

**Editor:** Harry Waldman, MAA; hwaldman@maa.org

**Managing Editor:** Carol Baxter, MAA

**Advertising Coordinator:** Joseph Watson, MAA; jwatson@maa.org

**President:** Gerald L. Alexanderson, Santa Clara University

**First Vice-President:** Anita Solow, DePauw University

**Second Vice-President:** Ed Dubinsky, Georgia State University

**Secretary:** Martha Siegel, Towson University

**Treasurer:** Gerald J. Porter, University of Pennsylvania

**Executive Director:** Marcia P. Sward

**Associate Executive Director and Director of Publications and Electronic Services:** Donald J. Albers

Letters to the editor should be addressed to Harry Waldman, MAA, 1529 Eighteenth Street, NW, Washington, DC 20036.

Subscription and membership questions should be directed to the MAA Customer Service Center, 800-331-1622; e-mail: maahq@maa.org; (301) 617-7800 (outside U.S. and Canada); fax: (301) 206-9789. FOCUS is a benefit of MAA membership. The subscription price to individual members is \$6.00, which is included in the annual dues.

Copyright © 1998 by the Mathematical Association of America (Incorporated). Educational institutions may reproduce articles for their own use, but not for sale, provided that the following citation is used: "Reprinted with permission of FOCUS, the newsletter of the Mathematical Association of America (Incorporated)."

Periodicals postage paid at Washington, DC and additional mailing offices.

**Postmaster:** Send address changes to the MAA, P.O. Box 90973, Washington, DC 20090-0973.

ISSN: 0731-2040; Printed in the United States of America.

RESIDUAL

The original image is the sum of the three. Each pulls out different features of the original. We can think of the image as being synthesized by three different instruments, in a way similar to a musical orchestration where the final sound is the sum of the notes from each instrument.

This mathematical transcription is useful for a more efficient and accurate storage and processing of imaging data, but also provides tools for denoising and identifying structure in images. For example, it can sharpen detail in medical images, such as MRI, and be used to identify particular objects for diagnostic purposes.

# MATHEMATICS 1 AWARENESS 9 WEEK 8

April 26–May 2

## Mathematics & Imaging

Sponsored by the

- **Joint Policy Board for Mathematics:**
  - American Mathematical Society

# Mathfest98

Toronto July 15-18

**Attend the SIAM Annual Meeting on July 16 & 17**

Mathfest 98 attendees receive **FREE ADMITTANCE** to the SIAM Annual Meeting at the University of Toronto. Take advantage of this opportunity to sit in on some of the SIAM sessions. For additional information, refer to the SIAM Website at [www.siam.org/meetings/an98/reginfo.htm](http://www.siam.org/meetings/an98/reginfo.htm).

## Mathfest Goes International!

**What's new in collegiate mathematics? Find out when you join colleagues in Toronto at Mathfest 98, July 15-18!**

You won't want to miss the Hedrick Lecture Series: Geometric Variational Problems, three lectures by Jean Taylor or Donald Saari speak on The Mathematics of Voting: What Causes Lousy Election Outcomes?; everyone will enjoy Joseph Gallian talk on Breaking Drivers' License Codes and Ross Honsberger on Some Mathematical Morsels.

Looking for other activities? How about the contributed paper session on Multimedia and Mathematics Education, or the minicourse on Cooperative Learning in Undergraduate Mathematics Education, or the special session on Great Theorems of Mathematics, or a workshop on Integrating Active Learning Techniques into Lectures or...dozens of other mathematical sessions, social events, and the charms of Canada in the summer.

Come to the meeting early and attend the Short Course on Mathematics and Magic by Brent Morris and Arthur Benjamin. This is a meeting you want to attend in a place you want to visit. **DON'T MISS IT!**

*Review the descriptions of lectures, sessions, and other events on the inside pages. **How to Register** instructions and forms*

*included. Mathfest 98 information may also be accessed via MAA Online at [www.maa.org](http://www.maa.org).*

## MATHFEST 98 DEADLINES

Early Bird Registration .....	May 29
On-Campus Hotel Reservations .....	June 1
Dormitory Housing Reservations .....	June 1
Delta Chelsea Inn Reservations .....	June 11
Regular Registration .....	June 29
Short Course Registration .....	June 29
Minicourse Registration .....	June 29

# Invited Addresses

## HEDRICK LECTURE SERIES

Jean Taylor Rutgers University

### Geometric Variational Problems

#### Lecture 1: Soap Films

Thursday, 9:30 am-10:20 am

#### Lecture 2: Crystals

Friday, 9:30 am-10:20 am

#### Lecture 3: Ice Cubes versus Snow Flakes

Saturday, 9:30 am-10:20 am

## AWM-MAA INVITED ADDRESS

Margaret H. Wright Bell Laboratories, Lucent Technologies

### The Interior-Point Revolution in Constrained Optimization

Thursday, 3:05 pm-3:55 pm

## CMS-FIELDS-MAA INVITED ADDRESS

Leon Glass McGill University

### Mathematics Education for the Life Sciences

Thursday, 8:30 am-9:20 am

## MAA STUDENT LECTURE

Ross A. Honsberger University of Waterloo

### Some Mathematical Morsels

Saturday, 3:05 pm-3:55 pm

## NAM-MAA INVITED ADDRESS

Nathaniel Dean Rice University

### Network Visualization

Friday, 8:30 am-9:20 am

## PI MU EPSILON

### J. SUTHERLAND FRAME LECTURE

Joseph A. Gallian University of Minnesota, Duluth

### Breaking Drivers' License Codes

Friday, 8:00 pm-9:00 pm

Dorothy Buerk Ithaca College

### What We Say, What Students Hear:

#### A Case for Active Listening

Thursday, 10:30 am-11:20 am

Henry O. Pollak Columbia University

### Stability and Sensitivity in High School and College Mathematics

Friday, 10:30 am-11:20 am

Liliane Beaulieu Université de Montréal

### Bourbaki Choices

Friday, 3:05 pm-3:50 pm

Andrew Odlyzko AT&T Labs

### Primes and Zeros of the Zeta Function: Conjectures and Computations

Saturday, 8:30 am-9:20 am

Donald G. Saari Northwestern University

### The Mathematics of Voting:

#### What Causes Lousy Election Outcomes?

Saturday, 10:30 am-11:20 am

# Special Sessions

feature presentations or panel discussions. The speakers are invited by the organizers and selected because of their knowledge and accomplishments in the focal area of the session.

## Models of Mathematical Sciences and their Applications throughout the Curriculum

Lee Zia University of New Hampshire

Frank Giordano COMAP

This is Part 2 of a session (Part 1 will be presented at the SIAM meeting); the two parts are related but not codependent. In this session, presenters will report on innovative models that illustrate the infusion of the mathematical sciences and their applications throughout a course and/or curriculum. Special attention will be paid to working with colleagues from non-mathematical science disciplines during the conceptualization, development, and implementation stages of a project. Sustainability issues will be discussed. Speakers include Michael Moody, Harvey Mudd College; Dan Schwalbe, Macalester College; Daniel P. Maki, Indiana University; and Kurt Bryan, Rose-Hulman Institute of Technology.  
Thursday, 1:00 pm-2:50 pm

## Teaching Collaborations between 2-year and 4-year Colleges

Bonnie Gold Wabash College

Sheldon P. Gordon SUNY Farmingdale

Teaching collaborations between two- and four-year colleges can have benefits for both schools. These benefits include facilitating student transitions between two-year colleges and the four-year schools at which they finish their undergraduate degrees, and contributing to faculty development at both schools. The panelists, including Jacqueline Giles, Houston Community College; Central College; Doris Schattschneider, Moravian College; and Karen Sharp, Mott Community College, will discuss collaborations of this sort in which they have been involved: how they came about, what the collaboration involved, what the results were, and what pointers they have for making such collaborations work. This panel is sponsored by the Committee on the Teaching of Undergraduate Mathematics (CTUM) and Committee on Two Year Colleges (CTYC).  
Thursday, 1:00 pm-2:50 pm

## Concurrent Models:

### Teaching Mathematics while Developing Teaching Skills

Morris Orzech Queens University

Eric Muller Brock University

David Poole Trent University

In this CMS-Fields-MAA panel, the presenters will discuss some models for addressing the initial and ongoing development of teaching skills at various levels, in the context of activity whose primary focus is mathematics.  
Thursday, 3:55 pm-5:45 pm

## Assessment Alternatives

Janet C. Woodland University of Arkansas

Heather Hulett Miami University (Ohio)

How can we create and evaluate a variety of assignments to encourage and measure student learning, beyond the traditional homework problem sets and quizzes? Examples of some such assignments include: presentations, re-writing textbook selections, peer review of writing assignments, projects, and course portfolios. Invited panelists will provide detailed examples of such assignments and how to grade them; this will be followed by a breakout and discussion session where participants can exchange ideas.  
Thursday, 3:55 pm-5:45 pm

## The Mathematics Education of Teachers Project

Marjorie Enneking Portland State University

The Mathematics Education of Teachers Project, funded by the US Department of Education, is a joint effort of the mathematical sciences professional societies. The project will set guidelines for the initial mathematics preparation and continuing mathematical development of teachers P-12 and encourage supporting activities to foster the implementation of these recommendations. After a description of progress to date, there will be an open forum to gather suggestions and reactions to be used by the project steering committee and writing team. Sponsored by Committee on the Mathematical Education of Teachers (COMET), the panelists will include W. James Lewis, University of Nebraska, Mary M. Lindquist, Columbia State University, and Gail F. Burrill, NCTM.  
Friday, 1:00 pm-2:50 pm

**Integrating Active Learning Techniques into Lectures**

Sandra L. Rhoades Keene State College

This participatory workshop is for faculty who are interested in learning about and discussing ways to incorporate active learning techniques into lectures. For some people, this may be a beginning step toward moving away from lectures; for others, it is simply a way to increase the effectiveness of their lectures. A wide variety of techniques that require minimal in-class time will be presented and discussed. Workshop participants will be actively involved — little to no lecturing will occur during the workshop.

Friday, 1:00 pm -2:50 pm

**Strengthening Under-represented Minority Mathematics Achievement (SUMMA) Programs**

William A. Hawkins Director of SUMMA

Presentations on summer mathematics programs for pre-college minority students will be given by project directors Kenneth Bernard, Niagara University, and Eric Muller, Brock University. Jack Narayan, SUNY Oswego, and Florence Fasanelli, director of SUMMA Intervention Programs, will describe the new SUMMA Leadership Program which assists mathematics departments in initiating programs for college and pre-college minority students.

Friday, 4:10 pm-6:00 pm

**Strategies to Solve Potential Classroom or Professional Challenges**

K. Renee Fister Murray State University

Jennifer Beineke Trinity College

Lisa Lister Bloomsburg University

What would you do if a student or colleague accused you of harassment? Suppose you are in charge of a group and the group is discriminating against one of the members. How would you handle the situation? In this workshop, several such scenarios that could arise in the classroom or workplace will be investigated. Participants will be divided into groups and given sample problem situations. The groups discuss the situations and develop ideas for solutions, and provide a synopsis of a solution to all participants. Then members of the panel will give suggestions based on their experience and expertise.

Friday, 4:10 pm-6:00 pm

**Mathematical Software in Education**

Robert M. Corless University of Western Ontario

William F. Langford Fields Institute

The purpose of this CMS-Fields-MAA session is to give a timely update, both "from the trenches" and from the viewpoint of software developers, of the impact of mathematical software on mathematics education. Of particular interest are the effects of mathematical software on the content of the curriculum, and on the potential for improvement in learning. The speakers will include Robert M. Corless, University of Western Ontario ("What We Can Do Affects What We Should Teach"), Pal Fischer, University of Guelph ("Maple in the Classroom"), Robert J. Lopez, Rose-Hulman Institute of Technology ("Maple, Laptop Computers, and the Twenty-first Century"), and Lawrence F. Shampine, Southern Methodist University ("ODE Architect").

Saturday, 1:00 pm-2:50 pm

**Great Theorems of Mathematics**

Douglas Ensley Shippensburg University

Cheryl Olsen Shippensburg University

This session will consist of four talks which address the proof of an important theorem in mathematics. The theorems will be taken from a variety of mathematical disciplines. Each talk will present a proof at a level that is accessible to a general mathematical audience. This session is intended to expose the audience to proofs of theorems that every mathematician should know.

Saturday, 4:10 pm-6:00 pm

**Mathematical Modeling Using Pre-calculus Mathematics**

Cathy Murphy Purdue University (Calumet)

Philip Quatararo, Jr. Southern University

Panelists, including Daniel Maki, Indiana University, and Diana Fisher, Franklin High School (Portland, OR), will discuss: what they mean by modeling, their experiences with modeling and with teaching modeling, why they believe modeling is important for school teachers to know, how and in what courses they believe modeling should be introduced for preservice teachers, and how and in what courses they believe modeling should be introduced for school level students.

Saturday, 4:10 pm-6:00 pm

**She Does Math: Exemplary Women in Mathematics-Related Careers**

Carolyn Connell Westminster College of Salt Lake City

Kathleen Sullivan Seattle University

Virginia Knight Meredith College

Women from a variety of professions requiring mathematics and outside academia will speak about their work, their educational backgrounds, and their career paths. Marla Parker, Sun Microsystems, and editor of "She Does Math," will be a member of the panel. She will be joined by other women represented in her book who have mathematics-related careers in business and industry. Sponsored by the Committee on the Participation of Women (CPW).

Saturday, 4:10 pm-6:00 pm

**Investing for Retirement Seminar**

Conducted by a certified financial planner, this seminar presents financial investment strategies for retirement. Areas of discussion include savings strategies, fighting inflation's effect now and in the future, ways to approach estate planning and protecting assets from inheritance and estate taxes.

Thursday, 3:55 pm-5:45 pm

# MAA Contributed Paper Sessions

are organized around a pre-determined topic. Presenters are selected by the paper organizers after reviewing responses to a call for papers.

---

## The Use of Technology in the Teaching of Applications in Undergraduate Mathematics

Howard Lewis Penn US Naval Academy  
Elizabeth Teles National Science Foundation

The use of computer programs and calculators have made it much easier to study real world applications in courses ranging from precalculus through senior level mathematics courses. In this session, papers will highlight how the innovative use of technology can be used to aid in the teaching of applications. Papers may cover applications to any subject as well as any level mathematics course.

Part 1: Thursday, 1:00 pm-2:50 pm  
Part 2: Friday, 4:10 pm-6:00 pm

## Mentoring Mathematics Students

Jean Bee Chan Sonoma State University

Why should students choose to major in mathematics? Why should mathematics majors persist and ultimately succeed as mathematicians? Will they stumble on the first "proof" course? How can faculty guide mathematics majors to reach their maximum potential? Those having had positive experiences attracting students to study mathematics will present their ideas on how to motivate students to persevere and succeed in mathematics.

Part 1: Thursday, 1:00 pm-2:50 pm  
Part 2: Friday, 1:00 pm-2:50 pm

## Innovative Ideas for Student-Collected Data

Cathy A. Godbois  
Harrisburg Area Community College  
Sheldon P. Gordon SUNY at Farmingdale

The use of real world data collected from experiments or from student research to motivate the teaching and learning of mathematics, is one of the strong threads that runs through much of the mathematics reform movement. In this session, papers will describe experiences using real world data that motivate both the mathematical development of, and students' appreciation for, the utility of mathematics at any level of the curriculum.

Part 1: Thursday, 3:55 pm-5:45 pm  
Part 2: Saturday, 1:00 pm-2:50 pm

## Mathematics Across the Disciplines

Duff Campbell U.S. Military Academy  
Jim Rolf U.S. Military Academy

There is interest in efforts to move mathematics across the curriculum. Papers in this session will describe interdisciplinary activities that integrate mathematics with one or more partner disciplines. Examples may include one activity, one class, one project, one section, one course, or an entire curriculum, with emphasis on illustrations of specific activities which are transportable. This session is part of the activities of the CUPM subcommittee to promote and disseminate efforts on moving "Mathematics Across the Disciplines."

Part 1: Thursday, 3:55 pm-5:45 pm  
Part 2: Saturday, 4:10 pm-6:00 pm

## Multimedia and Mathematics Education

Professor Ronald Sklar St. John's University  
Richard O'Lander St. John's University  
Tingxiu Wang Oakton Community College

Advances in multimedia have created a new means of applying technology to mathematics education. This includes such things as interactive video, CD-ROM technology, hypermedia, hypertext, expert systems, teleconferencing and virtual reality. Technology is changing the way in which mathematics is being taught. Programs have been developed which integrate this technology into the mathematics curriculum. Papers in this session will discuss applications of multimedia to mathematics instruction, as well as the success and failure of such projects.

Part 1: Friday, 1:00 pm-2:50 pm  
Part 2: Saturday, 1:00 pm-2:50 pm

## Interactive and Dynamic Visualization for Precalculus and Calculus

Martin Flashman Humboldt State University

Many new applications of technology allow interactive and dynamic visualization that enhance student understanding of concepts in both calculus and precalculus courses. Presentations at this session will discuss and illustrate some of the most recent of these applications such as those using real data collection techniques with calculators, animations, and dynamic software such as Geometer's Sketchpad and Cabri.

Friday, 4:10 pm-6:00 pm

# Minicourses

offer four hours of focused instruction. Enrollment is limited and a separate registration fee is required. Refer to the Registration Information and the Registration Form for details.

**1**

## Developing Materials for Liberal Arts Mathematics That Use Elementary Graph Theory and Emphasize Applications to Everyday Experience

Helen Christensen Loyola College in Maryland

Content, techniques, and illustrative problems will be presented, suitable for enabling participants to develop materials for a liberal arts mathematics course appropriate to their student population, using a limited amount of theory, and emphasizing day-to-day applications to which students can readily relate. Included, for each type of problem considered, will be a synopsis of relevant theory, demonstration problems with solutions, and participant team solutions of similar problems.

Part A: Thursday, 1:00 pm-2:50 pm

Part B: Friday, 1:00 pm-2:50 pm

**2**

## Fuzzy Neighborhoods and the Fuzzy Unit Interval

Joseph M. Barone BFR Inc.

This course will introduce the subject of fuzzy topology by exploring two subjects which emphasize its role as a generalization of ordinary (point-set) topology: fuzzy neighborhoods and the fuzzy unit interval. For each topic, the course will focus on the relationship between the fuzzy concept and its ordinary counterpart. No special background in topology will be assumed, but some familiarity with set theory and real analysis will be useful. No text will be used; materials and in-class exercises will be distributed at the course.

Part A: Friday, 1:00 pm-2:50 pm

Part B: Saturday, 1:00 pm-2:50 pm

**3**

## Cooperative Learning in Undergraduate Mathematics Education

Barbara Reynolds Cardinal Stritch University

William E. Fenton Bellarmino College

Participants will be introduced to cooperative learning in undergraduate mathematics courses at all levels. Participants will engage in various cooperative learning experiences, work in several different small groups and reflect on ways of forming groups in their own classrooms, discuss issues related to assessment and grading, and talk about potential problems and ways of avoiding or overcoming such problems. No prior experience with cooperative learning is expected. Some readings will be distributed during the course.

Part A: Thursday, 1:00 pm-2:50 pm

Part B: Friday, 4:10 pm-6:00 pm

**4**

## A Hands-On Approach to Geometry

Colm Mulcahy Spelman College

Too often, geometry is presented in an axiomatic way, divorced from reality and real world experiences. Natural curiosity about practical considerations (e.g., symmetry, locations, distances, areas and navigation) can be turned into a genuine desire to learn mathematics when a hands-on, discovery-based approach is taken. In this minicourse, participants will be led on a guided tour of discovery that goes beyond traditional planar geometry: spherical, hyperbolic and projective geometry will all be explored interactively, in a cooperative group-learning environment.

Part A: Friday, 4:10 pm-6:00 pm

Part B: Saturday, 1:00 pm-2:50 pm

## EXHIBIT HALL HOURS

**Thursday, Friday  
& Saturday**

**9:00 am to 5:00 pm**

Located in the  
North Hub of Ryerson  
Polytechnic University

Shop for new publications and products and revisit old favorites at the **Mathfest 98 Exhibit Hall**. This is your opportunity to review the latest books, play with innovative calculators and preview software. Meet company representatives and receive feedback that will assist you in making purchase decisions.

In the Exhibit Hall, you'll find the popular **MAA Bookstore**. There you can select from MAA's extensive collection of books on mathematics, mathematics education, and related topics. Schedule time to browse through the new titles premiering at Mathfest 98. Purchase books at the meeting and you'll save money with a special discount!

# The 2-Day Short Course

precedes Mathfest 98 and requires a separate registration fee. For details, refer to the Registration Form or the Short Course section at MAA Online, [www.maa.org](http://www.maa.org).

## Calculated Deceptions: Mathematics and Magic

Arthur Benjamin Harvey Mudd College

S. Brent Morris National Security Agency

This course will teach participants mathematically based magic tricks that may be used to motivate mathematical discussions. Taught by professional "mathemagicians," the course will cover a wide range of subjects including: Secrets of Lightning Calculators, Calendar Calculating, Magic Squares, Card Tricks, Card Shuffling, and Fibonacci Numbers. Each trick will be explained, along with its underlying mathematics, ranging from high school math to group theory, probability, and topology. Interested participants will also be given the chance to present their favorite tricks to the group, with the expectation that everyone will leave the course with an actual "bag of tricks" to use in the classroom. Special guest appearances by other magician mathematicians are anticipated.

Tuesday, July 14 and Wednesday, July 15, 8:30 am-5:00 pm

## Social Events

Meet and share ideas with your peers at a variety of social events being held at Mathfest 98. You can reserve your tickets by ordering through advanced registration (see Registration Form). Banquet events will offer vegetarian meals if requested on the registration form. Cancellations must be received in writing by June 29 for a 50% refund. No refunds are available after this date.

### "Mystic Festival"

Kickoff Mathfest 98 with food and magic! Enjoy a full-course meal with old friends and new colleagues. Brent Morris and Arthur Benjamin will entertain you with a mathematical bag of tricks. The Mystic Festival takes place in the Courtyard of Pitman Hall at Ryerson Polytechnic University. Participants and guests are welcome to attend on Wednesday from 7:00 pm to 10:00 pm. Tickets are \$27.

### PME Banquet

This annual event will be held on July 17. Tickets are \$12 and \$20. After the banquet, attend the popular PME J. Sutherland Frame lecture, given this year by Joseph A. Gallian of the University of Minnesota, Duluth on "Breaking Drivers' License Codes."

### SIAM BBQ Party

On Thursday, July 16th, SIAM invites Mathfest 98 attendees to a Canadian Style BBQ at the SIAM Annual Meeting. The BBQ will be held at the University of Toronto. Reservations are required and admission is by ticket only. Contact SIAM for ticket price and registration information at [www.siam.org/meetings/an98/reginfo.htm](http://www.siam.org/meetings/an98/reginfo.htm).

### MAA 25-Year Member Banquet with Peter Rosenthal speaking on "Why I'd Rather be a Mathematician than a Lawyer"

Rosenthal is a University of Toronto Professor of Mathematics and a Barrister with Roach, Schwartz & Associates

Moderated by  
Doris Schattschneider Moravian College  
Saturday, 6:30 pm-9:00 pm

The 21st annual banquet honors those individuals who have been members of the MAA for 25 years or more. There will be a reception prior to the banquet in the Mountbatten Ballroom at the Delta Chelsea Inn. Tickets are \$35.

### AWM Reception

Plan to attend this cooperative party with the Association for Women in Mathematics on Thursday at 9:00 pm, in the Oakham House at Ryerson! All supporters of women in mathematics are encouraged to attend and to meet AWM members.

## MATHFEST 98 DEADLINES

Early Bird Registration  
May 29

On-Campus Hotel Reservations  
June 1

Dormitory Housing Reservations  
June 1

Delta Chelsea Inn Reservations  
June 11

Regular Registration  
June 29

Short Course Registration  
June 29

Minicourse Registration  
June 29

# Student Activities

Students and faculty will be interested in presentations of student work in sessions sponsored by the MAA and PME, and in the Invited Lectures developed with students in mind. Starting with a student reception on Wednesday night, Mathfest 98 includes a rich array of activities for students. At the Student Hospitality Center — open Thursday through Saturday — students and other Mathfest attendees can meet for informal conversation, refreshments, and mathematical diversions. The Hospitality Center also provides programs for the student paper sessions, packets for students presenters, and information on Mathfest activities of interest to students. Special information for students can be found on MAA Online at [www.maa.org](http://www.maa.org).

## MAA/Pi Mu Epsilon Student Reception

Wednesday, 5:30 pm-6:30 pm

## MAA and Pi Mu Epsilon Student Paper Sessions

Thursday, 1:00 pm-5:00 pm

Friday, 1:00 pm-5:00 pm

## Pi Mu Epsilon Banquet

Friday, 6:15 pm-7:45 pm

See the Mathfest Registration Form for ticket information.

## PI MU EPSILON J. SUTHERLAND FRAME LECTURE

Joseph A. Gallian *University of Minnesota, Duluth*

### Breaking Driver's License Codes

Friday, 8:00 pm-9:00 pm

## MAA STUDENT WORKSHOP

### Mathematics in Stone and Bronze:

### Mathematical Problems Associated with Doing Mathematical Sculpture

Helaman Ferguson

This workshop will consist of two parts. The first part will be an interactive lecture with slides and video, giving general background and descriptions of various sculptures. Mathematical problems originating in the sculptural process — which can be qualitative or quantitative — will be set up. The second part will be even more interactive: some of the problems raised will be solved, old solutions will be discussed, new solutions entertained, and perhaps some problems will be solved for the first time!

Saturday, 1:00 pm-2:50 pm

## MAA STUDENT LECTURE

Ross A. Honsberger *University of Waterloo*

### Some Mathematical Morsels

Saturday, 3:05 pm-3:55 pm

## STUDENT PROBLEM SOLVING COMPETITION

Richard Neal *University of Oklahoma*

Saturday, 4:10 pm-5:00 pm

This is the finals for The Problem Solving Competition. Universities and colleges that participate monthly on their own campuses by holding problem solving contests are invited to send two contestants. Each contestant will be required to solve a series of mathematics problems. Based upon the outcome, national champion and national runner-up will be named.

## Call for Student Papers

Students who wish to present a paper at Mathfest 98 must be nominated by a faculty advisor familiar with the work to be presented. Students who make presentations at Mathfest 98, and who are also members of MAA Student Chapters are eligible for partial travel reimbursement through a grant from the Exxon Education Foundation.

To propose a paper for presentation, students must complete a form and obtain the signature of a faculty sponsor. Nomination forms are located on MAA Online at [www.maa.org](http://www.maa.org) under STUDENTS, or can be obtained from Dr. Charles Diminnie via email at [charles.diminnie@angelo.edu](mailto:charles.diminnie@angelo.edu) or by phone at (915) 942-2317, ext. 238. Deadline for receipt of papers is June 12, 1998.

# Registration Information

Ryerson Polytechnic University, Mathfest headquarters, is located in downtown Toronto, a city with approximately 3.5 million residents. The average July temperature is 72° F/22.1° C. The weather can vary from pleasantly warm to summery hot and humid with the possibility of sudden thunderstorms.

## How to Register for Mathfest 98

The Windsor Company, Inc., the official management firm for Mathfest 98, will coordinate arrangements and registration. (Note: "The Windsor Company" will appear on your credit card statement.)

**Early Bird Registration:** Register by May 29 to take advantage of the early bird savings and receive your registration packet before the meeting. Registration packets will be mailed on June 19 and there will be no need to register once you arrive.

**Regular Registration:** Registration forms received between May 30 and June 29 must include the regular registration fee. Registration packets must be picked up at the registration desk. You may also register on-site at the registration desk.

**Online Registration:** Register on the internet to receive instant confirmation by email! Go to [www.maa.org](http://www.maa.org) and click on "Register for Mathfest 98." Complete the form and payment information. Payment accepted by the following credit cards only: MasterCard, Visa, American Express, Discover, and Novus.

**Minicourse/Short Course Registration:** Advance registration forms must be received by June 29. Enroll early, space is limited! If a course is full, you will be notified. On-site registration allowed if enrollment permits. The MAA reserves the right to cancel courses due to low enrollment. Full refunds will be issued for cancelled courses.

**Registration Desk:** Located in the Center Hub at Ryerson Polytechnic University, registration opens Wednesday from noon to 7:00 pm. Thursday through Saturday hours will be 8:00 am to 4:00 pm. You may pick up and purchase event tickets at this location.

**Mail-in Registration:** Make checks payable to *The Windsor Company*. Checks must be made in U.S. funds and drawn on a U.S. bank. Completed forms with credit card information may be faxed. Mail/fax forms to:

**The Windsor Company, Inc.**  
**5600 General Washington Dr., Ste B-201**  
**Alexandria, VA 22312**  
**Phone: (703) 642-9385**  
**Fax: (703) 642-9382**  
**Email: [mhollis@windsor-inc.com](mailto:mhollis@windsor-inc.com)**

Registration forms with insufficient payment will be returned or assessed a \$5US charge for production of an invoice to collect the delinquent amount. A \$25US penalty will be charged for returned checks.

**Refund Policy:** Cancellations must be received in writing by June 29 for a 50% refund on registration and event tickets. Send requests to The Windsor Company.

## Mathfest Housing

Rooms are reserved at the Delta Chelsea Inn, and two facilities at Ryerson: International Conference Center (I.C.C.) and Pitman Hall. You must contact these facilities directly for reservations. Prices are quoted in Canadian dollars and are subject to taxes. (See Currency Exchange/Goods and Services Tax (GST) section for more information.)

**Delta Chelsea Inn:** Located near Ryerson Polytechnic University. For reservations, call 1-800-CHELSEA (1-800-243-5732). Mention code GBMAA and The Mathematical Association of America to receive the special rates for Mathfest: single: \$159.00CAN; double: \$179.00CAN.

**Ryerson University Housing:** Pitman Hall provides dorm housing with single rooms only. The I.C.C. offers low-budget housing in the on-campus hotel facility. A small portion of room rates subsidize charges for meeting space. Pitman Hall: \$47.00CAN; The I.C.C.: single/double: \$61.00CAN, triple/quad (limited availability): \$69.00CAN.

To make reservations at Pitman Hall or the I.C.C., complete the Ryerson Conference Housing Form enclosed. The form may be mailed or faxed to:

**Conference Services**  
**Ryerson Polytechnic University**  
**Pitman Hall**  
**160 Mutual Street**  
**Toronto, Ontario M5B 2M2**  
**Canada**  
**FAX: (416) 979-5212**

## Travel Information

**Airline:** Air Canada, the official airline for Mathfest 98, offers non-stop service from over 40 U.S. cities. To take advantage of special Mathfest fares, you must travel round-trip on an Air Canada or United Airlines flight that shares service with Air Canada. For reservations, call Travel Unlimited at 1-800-444-7176 or Air Canada at 1-800-361-7585. Mention Mathfest Event Number CV987017 for special rates.

**Travel from Airport:** Toronto (Pearson) Airport, located about 40 minutes from downtown, has three terminals. Taxis service,

regular transit buses to the subway, and feeder (shuttle) buses go to downtown hotels. One-way taxi fares are \$35-\$45CAN. Feeder buses to downtown leave every 20 minutes. One-way fare: \$12.50CAN. Also, you may take a regular transit bus, (\$6.75-\$8.00CAN) to the subway. The subway (\$2CAN one-way) goes to both Ryerson and the Delta Chelsea. For more information, call Tourism Toronto at (800) 363-1990 or visit their web site at [www.tourism-toronto.com](http://www.tourism-toronto.com).

**Meal Information:** You may dine at Ryerson's two dining facilities in Pitman Hall or in the I.C.C. The I.C.C. cafeteria resembles a restaurant; prices are average and vary based on menu. Operation hours and meal prices:

Pitman Hall: 7:30 am to 2:30 pm, M-F  
 Breakfast \$4.50CAN  
 Lunch \$9.00CAN

I.C.C.: 7:30 am to 9:30 pm daily  
 Continental Breakfast \$4.75CAN  
 Buffet Breakfast \$6.95CAN  
 Lunch \$6.00CAN  
 Dinner \$12.00CAN

**Parking:** Passes may be purchased upon arrival from the Pitman Hall Front Desk: \$10.50CAN per day, \$28.75CAN for three days, and \$57.50CAN per week. A 24-hour access card, which must be returned, will be issued. (A refundable \$20.00CAN deposit is required.) Parking is also available at the 160 Mutual Street and Victoria/Dundas garages.

**Currency Exchange/Goods and Services Tax (GST):** The exchange rate is approximately \$1.00US to \$1.35CAN. Rates vary, so you should check the exchange rate before you leave for Mathfest.

We recommend exchanging some money before leaving for the meeting. For best rates, you should do so at a financial institutions, such as a bank, trust company or currency exchange. Currency exchanges are located at most major airports.

The GST = 7% of the total purchase in most Canadian provinces. As a visitor, you can request a refund for GST on housing accommodations and most goods you take home. The GST on meals and beverages, wine, beer, liquor, tobacco products, transportation, and some services is non-refundable. Further information about the GST and refund applications will be available at Mathfest Registration Desk.

**DEADLINES** Early Bird Registration: May 29 Regular Registration: June 29 50% Refund on Registration and Event Ticket Cancellation: June 29

## Register for Mathfest 98 Online!

Receive instant confirmation when you register online. Here's how to do it:

**1**

Go to **MAA Online** at [www.maa.org](http://www.maa.org)

**2**

Click on **Register for Mathfest 98**

**3**

Complete the form and payment information

**It's that simple!**

No phone call needed or form to mail.  
You will receive an email immediately  
to confirm your registration.

# EMPLOYMENT OPPORTUNITIES

## LOUISIANA

### LOUISIANA TECH UNIVERSITY Mathematics and Statistics

The College of Engineering and Science invites applications for possible non-tenure-track positions at the rank of instructor and tenure-track positions at the rank of assistant professor commencing Fall 1998. Rank and salary will be commensurate with qualifications. Excellent credentials are required. Teaching duties will be primarily at the freshman and sophomore levels. The Mathematics and Statistics Program offers a B.S., an M.S., and is a major participant in the interdisciplinary Applied Computational Analysis and Modeling Ph.D. program. Please send a letter of application, curriculum vitae, and a list of three professional references to: Dr. James Nelson, Associate Dean for Undergraduate Studies, College of Engineering and Science, Louisiana Tech University, Ruston, LA 71272-0046. Applications will be accepted until the positions are filled. Louisiana Tech University is an equal opportunity, affirmative action employer. Women and minorities are encouraged to apply.

## NEW YORK

### BRONX COMMUNITY COLLEGE OF CUNY

The Department of Mathematics and Computer Science invites applications for anticipated tenure track positions starting in September, 1998. A Ph.D. in mathematics or computer science is preferred although enrollment in a doctoral program is desirable in its absence. Candidates must have a record of and commitment to excellence in teaching and continue scholarly activity. The department has 26 full-time and 55 part-time faculty members. Courses offered range from developmental to upper level mathematics and computer science. Bronx Community College encourages applications from women and minority candidates and is an AA/EOE. Send a letter of application, a statement of teaching philosophy, resume, graduate transcript(s), and three recent letters of reference (at least one should address teaching) to:

Prof. Germana Glier  
Chair, Mathematics and Computer Science  
Bronx Community of CUNY  
University Ave. and West 181 St.  
Bronx, NY 10453

### ROCKY MOUNTAIN MATHEMATICA

Join us this summer for a Mathematica workshop in the beautiful and cool mountain environment of Silverthorne, Colorado, located 9000 feet above sea level. From July 6-11, 1998, Ed Packel (Lake Forest College) and Stan Wagon (Macalester College), both accredited Wolfram Research instructors with much experience, teach an introductory course (for those with modest or no Mathematica background) and an intermediate course. Both courses have a strong emphasis on the use of Mathematica in mathematics education, covering applications to calculus and a wide variety of other undergraduate courses. For a registration form or more detailed information, contact us (packel@math.lfc.edu, (847) 735-5155; wagon@macalester.edu, (612) 696-6057) or visit our web site ([http://math.lfc.edu/Rocky\\_Mtn\\_Mathematica](http://math.lfc.edu/Rocky_Mtn_Mathematica)).

Participants may obtain graduate credit from the University of Colorado for completing the course.

Take things at face value  
and they may come back  
to bite you.

*Some things aren't what they seem - and that can be truly scary if it's your insurance plan. But MAA members don't have to make assumptions. Our group plans are cunningly chosen for you; there won't*

*be any surprises. If something seems funny about your insurance, call us at 800 424-9883, or in Washington, DC at 202 457-6820. We promise you a plan you can believe in. At rates that won't eat you up.*

# YOU'VE TAUGHT US WELL.

At Texas Instruments, we're proud to provide the leading calculators for Math and Science. But perhaps the most valuable tools we offer are not the calculators themselves, but the resources and programs that can help you and your students incorporate them into your classroom. Whether it's our activity books for every level, free calculator loans for workshops, or training made possible through our grants to T<sup>3</sup> workshops, our goal is to give you the support and resources you've requested. The success of these programs relies on your input. So the more we can learn from you, the more we can do for you. To learn more about our latest teacher support programs, visit our web site.
